NAHI BANA

1

BAHAR KA KAAM

Kul 49 items. "BANA" ka matlab: code likha aur tests/checks se dekha. Isse yeh nahi nikalta ki asli providers (Vapi, MSG91, Twilio, AWS) ke saath live test hua hai: woh alag baaki hai jahan likha hai.

Sabse zaroori baaki cheezein

- Asli provider test: Vapi ki ek asli call, MSG91 DLT ka ek asli SMS, Twilio OTP. Jab tak yeh nahi, "Tool 3" aur SMS live nahi kehlayenge.
- Legal sign-off (P0-12): calling hours, AI disclosure wording, consent text, retention days. Isse pehle live sends blocked hain (yeh design hai).
- Official filing forms aur Manitoba ke limits: asli form/figures chahiye, guess nahi kiye.
- Demo server deploy aur pehla live pilot: abhi koi nahi.
- Chhote buildable items: IN missed-call entry, canvasser photo notes, vehicle log, assistant ka SMS channel (CA), campaign ki phone helpline, PDF roll extraction (sirf text-wale PDF ke liye).
- Review chahiye: French, Tagalog aur pitch deck ke translations (native speaker).

1. Aath tools ka status (PDF section 01)

Tool 1: Voter info hub (IN + CA)

AADHA

Page, language buttons, read-aloud, share links, QR bane hain. Recorded audio, self-hosted fonts, French/Tagalog ab bane hain. Baaki: IN ka missed-call se entry (sirf database mein naam hai, koi flow nahi).

Tool 2: AI campaign assistant (web)

BANA

Sirf approved content se jawab, voting ke sawal official link par, French/Tagalog bhi.

Tool 2: Phone helpline Punjabi/Hindi (IN)

AADHA

Constituent-service ke liye Vapi helpline bani hai. Campaign ke assistant ke liye alag phone helpline nahi bani.

Tool 2: SMS channel (CA)

AADHA

Inbound SMS service tickets ke liye hai. Assistant se SMS par sawal-jawab nahi bana.

Tool 3: AI voice calls aur surveys

AADHA

Poora code, per-call compliance check, evidence pack bane hain. Asli call kabhi nahi lagi: Vapi/DLT live account se test baaki.

Tool 4: Booth worker / canvassing app

AADHA

Offline app, map view, roll se household import bane hain. Photo notes nahi bane. PDF roll se text extraction nahi.

Tool 5: Workers, rallies, lawn signs

AADHA

Events, permissions, shifts, DLT reminders, sign routes (road routing ke saath) bane hain. Alag "vehicle log" nahi bana (sirf vehicle event + permission).

Tool 6: Expenditure / campaign finance

AADHA

Receipt photo upload, bank reconciliation, filing export bane hain. Official filing layouts DRAFT hain: asli form se confirm baaki.

Tool 7: Poll day / election night results

BANA

Phase 3 mein bana (PR #8). Details section 3 mein.

Tool 8: Constituent service platform

BANA

Phase 3 mein bana (PR #8). Details section 3 mein.

2. P0: pehli live campaign se pehle (PDF section 03)

P0-1 SMS OTP provider (Twilio CA, DLT IN)

BANA

Code bana. Asli provider account se test nahi hua.

P0-2 Redis + BullMQ (call runs, reminders, reports)

BANA

Row locking ke saath. Redis ke 8 tests is machine par skip hue (Redis nahi tha); CI mein chalte hain.

P0-3 Redis-backed rate limits aur sessions

BANA

P0-4 India DLT SMS adapter + template flow

BANA

MSG91 adapter docs se likha, mocked tests. Asli account se test baaki.

P0-5 Vapi live verification

AADHA

Adapter docs se check kiya aur ek verify script hai. Asli call kabhi nahi lagi.

P0-6 Call cost finance mein

BANA

P0-7 Evidence pack signed PDF

BANA

Seal (SHA-256 + HMAC) hai. Yeh sarkari/CA digital signature nahi hai.

P0-8 Paper/IVR consent + election ke baad data delete

BANA

Ek purana bug is baar theek hua (door-visit wale campaign ka purge fail hota tha).

P0-9 Production infra (Terraform per region)

AADHA

Likha aur terraform validate pass. AWS par plan/apply kabhi nahi hua.

P0-10 Observability (Sentry, logs, cost dashboard)

BANA

P0-11 Security pass

AADHA

Review, fixes, audit clean. Bahar ki penetration test baaki.

P0-12 Legal sign-off (calling hours, disclosure, consent, contracts)

BAHAR KA KAAM

Code se nahi hota: wakil/counsel ka kaam. Jab tak values set nahi, sends blocked rehte hain.

3. Phase 3 (PDF section 04)

Tool 7: agent reporting (phone link / SMS keyword, booth codes)	BANA
Tool 7: India turnout by booth, counting round-wise vs ECI Official figures team haath se ya CSV se daalti hai. Kisi sarkari system se connection nahi (guardrail).	BANA
Tool 7: Canada scrutineer counts vs City unofficial results	BANA
Tool 7: duplicates, "campaign reported" labels, archive, load test Load test script scripts/load-test-results.mjs.	BANA
Tool 8: ticket intake web + SMS + Punjabi/Hindi voice helpline Voice ke liye Vapi helpline setup docs/vapi-setup.md mein.	BANA
Tool 8: area-wise assignment, SMS status, acknowledgement	BANA
Tool 8: monthly reports aur "work done" export	BANA
Tool 8: monthly subscription billing Phase 5 mein packages ke saath badhaya.	BANA

4. Phase 4 (PDF section 05)

Maps with real tiles + road routing (turfs, signs)

BANA

Leaflet + OSRM. Tile provider aur routing server lagana hai (OpenStreetMap ka public server sirf halke use ke liye). Turf ke liye road routing nahi (households ka coordinate nahi).

Household import from electoral roll copies (PDF/Excel) + source proof

AADHA

Excel/CSV bana. PDF proof ban jati hai, par PDF se households khud nahi padhe jaate (haath se daalne padte hain).

Pre-recorded audio pipeline Punjabi/Hindi, self-hosted fonts, lighter page

BANA

Audio upload hoti hai (browser mein record nahi). Consent ka sentence abhi phone ki awaaz mein.

Official filing formats for finance registers

AADHA

System bana. Layouts DRAFT jab tak election agent / City asli form se confirm na kare.

Receipt photo upload (S3 in-region) + bank statement reconciliation

BANA

S3 bucket Terraform mein, validate pass, apply nahi. Real bank ke CSV se test nahi.

Multi-campaign agency view (white-label)

AADHA

Bana. Agency ka logo image, voter page / PDF par white-label, custom domain nahi.

French (Canada) + Tagalog voter-page content

AADHA

Bana. Native speaker ka review baaki. Dashboard sirf English/Punjabi/Hindi.

5. Phase 5

India: Punjab Vidhan Sabha 2027 package

BANA

Draft content, survey, checklist. 117 seats ki list nahi.

India: Punjabi/Hindi pitch deck

AADHA

Pehla draft docs/pitch mein. Slides dekhi nahi gayi, translation review baaki.

India: MCMC workflow with first clients

AADHA

Software ka MCMC certificate flow pehle se tha, checklist mein jodha. Clients ke saath asli process tumhara kaam.

Canada: Manitoba 2027 package + provincial rules

AADHA

Bana. Spending/contribution limit aur blackout jaan-boojhkar khaali: Elections Manitoba se bharne hain.

Mobile app wrappers (Android first)

AADHA

Capacitor scaffold apps/mobile mein. APK/AAB kabhi build nahi hua (Android SDK nahi).

Pricing, metering, invoicing per campaign

AADHA

Packages, limits, invoicing, plan editor bane. Asli prices daalne baaki, payment collection aur GST/HST invoice format nahi.

6. "Kya karna hai ab" list (PDF section 06)

1. Demo server deploy karke candidates ko dikhana Deploy nahi hua. Handover document ka section 05A.	NAHI BANA
2. P0 items 1-7 aur 9-10 parallel Code level par ho gaye.	BANA
3. Pehla live pilot (friendly candidate / sitting MLA) Abhi koi live pilot nahi.	NAHI BANA
4. Phase 3 pehle (constituent service)	BANA
5. Phase 4-5 Punjab 2027 aur Manitoba 2027 tak Upar ki tables dekho.	AADHA
Guardrails: no WhatsApp, no caste/religion, no bought data, no deepfakes, one client per race CI guardrail + code mein lage hain (roll import caste/religion column refuse karta hai).	BANA
